

## **ASME Press Bio and Nano Medical Devices & Materials Series**

### Proposal submission requirements

Please provide as much information as possible to help our early assessment:

1. Brief overview or synopsis of the topic. This may also be an extended abstract.
2. Chapter outline, if possible for the proposed work.
3. Sample published paper(s), or book chapter relevant to the topic. Links to this published material is also fine.
4. Estimated number of final published printed (not manuscript) pages would also be useful to insure we stay within the intended range of 50-100 pages for this concise series. Word count is estimated at 250 words per page for a 6x9 inch publication, which includes provision for figures and illustrations. The maximum number of words is approximately 25,000 words.
5. Proposed completion date of the manuscript.
6. Contact details of 3 proposed reviewers who are familiar with the work and are not currently sharing a professional affiliation with any of the authors.
7. Full contact details and current CVs for all proposed authors, including publishing history. Links to CV's with this information is fine.
