

Biomedical & Nanomedical Technologies

CONCISE MONOGRAPH SERIES

New monograph now available:

Ultrasonic Methods for Measurement of Small Motion and Deformation of Biological Tissues for Assessment of Viscoelasticity

by Hideyuki Hasegawa and Hiroshi Kanai

2014 50 pages Hardcover ISBN: 9780791860311

Order No. 860311 \$72.00 (member) \$89.95 (list)

Also available in the series:

- Photodynamic Therapy Mediated by Fullerenes and their Derivative
- GFP Whole Cell Microbial Biosensors: Scale-up and Scale-Down Effects on Biopharmaceutical Processes
- Biocompatible Nanomaterials for Targeted and Controlled Delivery of Biomacromolecules
- Impedimetric Biosensors for Medical Applications Current Progress and Challenges
- Nanomaterials in Glucose Sensing
- Chitosan and Its Derivatives as Promising Drug Delivery Carriers
- Silica Nanoparticles as Drug Delivery System for Immunomodulator GMDP
- Nanoparticles and Brain Tumor Treatment
- Mobile Wearable Nano-Bio Health Monitoring Systems with Smartphones as Base Stations

Introducing a New Concept in Scholarly Publishing from

Series Editor

Ahmed Al-Jumaily, Ph.D.

Professor of Biomechanical Engineering and Director of the Institute of Biomedical Technologies; Auckland University of Technology

Associate Editors

Christopher H.M. Jenkins, Ph.D., P.E.

Professor and Head, Mechanical & Industrial Engineering Department, Montana State University

Said Jahanmir, Ph.D.

President and CEO, MITIHeart Corporation

Shanzhong (Shawn) Duan, Ph.D.

Professor, Mechanical Engineering, South Dakota State University

Conrad M. Zapanta, Ph.D.

Associate Department Head of Biomedical Engineering, Teaching Professor of Biomedical Engineering, Carnegie Mellon University

William J. Weiss, Ph.D.

Professor of Surgery and Bioengineering, College of Medicine, The Pennsylvania State University

Siddiq M. Qidwai, Ph.D.

Mechanical Engineer, U.S. Naval Research Laboratory

Available from ASME in print in North and South America.

Print copies outside the Americas are available from Momentum.

Available as an eBook worldwide.

To order, go to asme.org/shop

Call For Authors

Authors from a broad range of **science and engineering disciplines** – *in academia, research institutions or industry, who are involved in the conception, design, development, analysis and operation of biomedical and biotechnological systems, materials and applications* – are invited to contribute.

ASME Press, the book publishing imprint of the American Society of Mechanical Engineers, is partnering with Momentum Press to publish a new series of concise (50-100 pages) monographs related to Biomedical and Nanomedical Technologies (B&NT). This is an exciting new publishing concept that combines elements of a traditional book series with a periodical publication.

Each monograph will be similar to an expanded journal article or technical paper, with the addition of applications or industry-related content, such as case studies. Sources for these concise monographs may include previously published journal articles, conference papers, and even book chapters. The books will aim to provide a mixture of theoretical and practical content that will appeal to engineers in both academia and industry.

Biomedical & Nanomedical Technologies (B&NT)

Scope

This concise monograph series focuses on the implementation of various engineering principles in the conception, design, development, analysis and operation of biomedical, biotechnological and nanotechnology systems and applications. Authors are encouraged to submit their work in the following core topics, but authors should contact the commissioning editor before submitting a proposal:

BIOMEDICAL DEVICES & MATERIALS

- Trauma Analysis
- Vibration and Acoustics in Biomedical Applications
- Innovations in Processing, Characterization and Applications of Bioengineered Materials
- Viscoelasticity of Biological Tissues and Ultrasound Applications
- Dynamics, and Control in Biomechanical Systems
- Clinical Applications of Bioengineering
- Transport Phenomena In Biomedical Applications
- Computational Modeling and Device Design
- Safety and Risk Analysis of Biomedical Engineering
- Modeling and Processing of Bioinspired Materials and Biomaterials

NANOMEDICAL DEVICES & MATERIALS

- Bio Nano Materials
- Nano Medical Sciences
- Materials for Drug & Gene Delivery
- Nanotechnology for Central Nervous System
- Nanomaterials & Living Systems Interactions
- Biosensing, Diagnostics & Imaging
- Cancer Nanotechnology
- Micro & Nano Fluidics
- Environmental Health & Safety
- Soft Nanotechnology & Colloids

**For more information about the new ASME Press series,
visit <http://www.asmeppress.org>**

**To submit a proposal for consideration and further information,
contact our editorial advisor, Dr. Nigel Hollingworth, at bionano.asme@gmail.com.**

Proposals and manuscripts are subject to peer review, and acceptance for publication is based on approval of both.

Accepted manuscripts may be submitted to Pub Med Central at the author's request.
